Designing Future \*Developing Experiences

**VEGAMCON**

Vegamoon technology excels in providing the visual aspects or bridging the gap between the brand and its related customers. The identity logo turns the brand name into a visual trigger, thus connecting the customer's mind with your brand. These are simple visual aspects.

In its simplest form, a logo is a mark or icon that identifies a company. The logo is simply the design that represents the company.

# COLOR VARIATION

# COLOR SCHEME

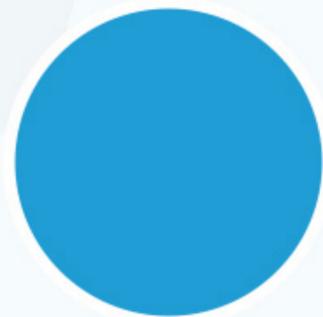

The bright blue colour often represents loyalty, confidence, authority and security. The blue shade has an impact, and companies use blue shades for special bonding.

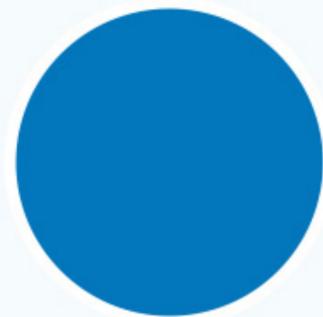

Black colour shades show the stronger side and character that will never fade. It is one of the strongest shades of showing compassion and trust.
